

# FYISOFT

## KEY ADVANTAGES

See how FYIsoft is redefining financial reporting with our cloud report writer.

### Excel-based report writers

#### FASTER PERIOD CLOSE

Difficult to generate dimensional reports by organization, business units and departments without following org structure.

Easy to provide the right team with the right data in the right report, streamlining the month end close process.

#### COMPONENT BASED

Excel data requires complex formulas, pivot tables, and manual effort to program or adjust how data should be interpreted.

FYIsoft provides flexibility to group and combine rows, columns or account codes to simplify accounting, reporting and maintenance.

#### REPORT GENERATION

Reports are manually generated - a process that is time consuming and prone to error.

Reports are easily created, updated and distributed in board-ready format every time.

#### REPORT DISTRIBUTION

Distribution requires hours of time; .xls data can be changed causing confusion with multiple file versions.

Preset distributions are easy and automated. Reports in the cloud ensure 24/7 access anytime, from anywhere, on any device.

#### EMPOWERED USERS

Static reports mean the finance team is the central point of contact for all user questions regarding financial reports.

Interactive, cloud reports empower users to drill down into transaction details and conduct analysis, easing reliance on the finance team.
