

When budgets have too many moving parts for Excel, it's time for BudgetFYI.

5 BUDGETING BEST PRACTICES

Gained with BudgetFYI

PROJECT MANAGEMENT

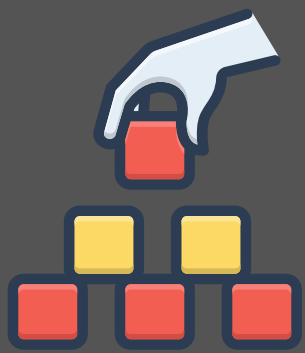

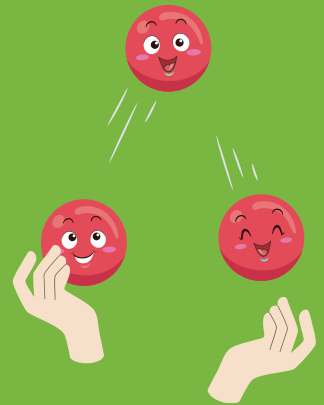

NO MORE HERDING SPREADSHEETS!

Web-based software provides secure, centralized control over the entire budget process. Track all the who, what, when with full accountability and no more missed deadlines. 24/7 access from any device.

MULTIPLE SCENARIOS

WITHOUT VERSION CONTROL ISSUES.

Budgets are never cut and dry. Gain the flexibility to simultaneously work on multiple scenarios such as best case, worst case, or somewhere in between.

LINE-ITEM DETAILING

BUILT FOR EASY REUSE.

Expenses and revenues are built out at a component level. You'll always know what's behind budgets for projects, people, vendors, events - and those details carry to every scenario, making future baselines easy.

TOP DOWN/BOTTOM UP

THE BEST OF BOTH WORLDS.

Keep budgets within acceptable ranges with assumptions and other top-down controls. At the same time, budget owners have the flexibility to account for their unique operations and cycles.

ROLLING FORECASTS

AUTO-UPDATED FOR ACTUALS.

Because BudgetFYI is integrated with actual reporting data, forecasts are auto-populated with actuals, making it easy to set up new rolling forecasts and re-project remaining forecast months.

TRY DOING ALL THAT WITH SPREADSHEETS!

GAIN CONTROL, ACCURACY, AND ENORMOUS TIME SAVINGS.

BudgetFYI is the ideal centralized solution for gaining control and implementing budgeting best practices.
